

Fraction Factor Shuffle

Materials:

- Paper clip
- Pencil
- Deck of cards with face cards removed (Ace = 1)

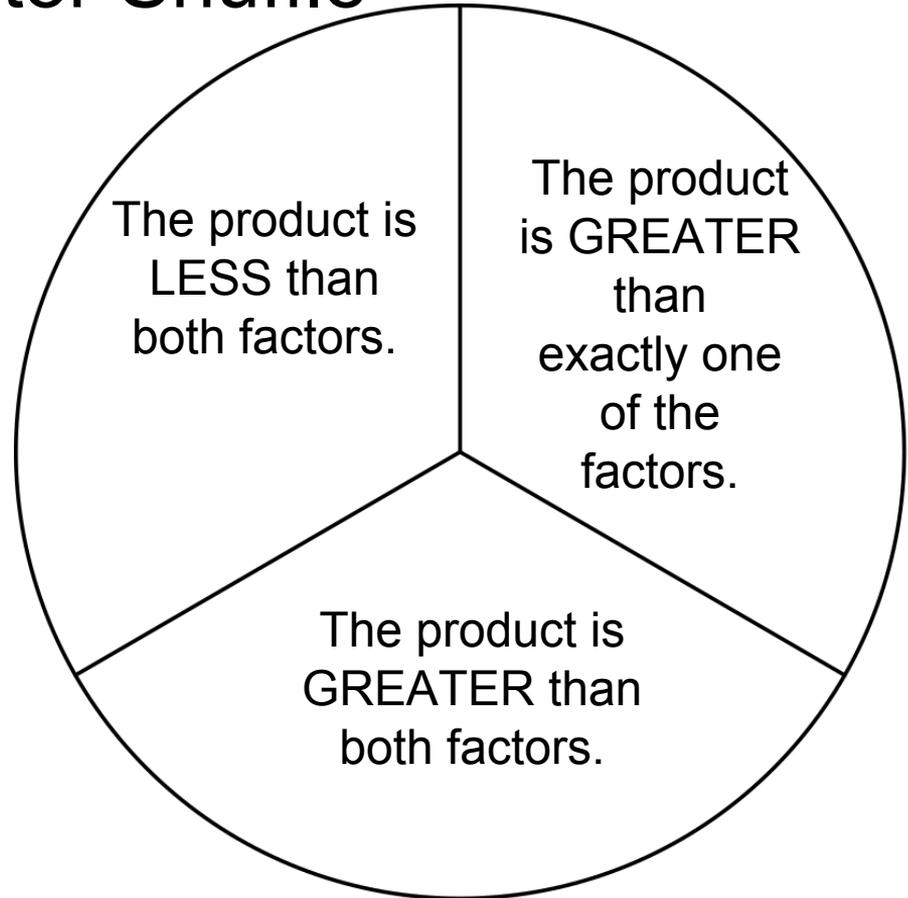

Directions:

1. Spin the spinner
2. Pick 5 cards
3. Keep 4 cards, reject one
4. Create an equation that matches the condition you spun.
5. Once the cards are placed on the mat, you may not rearrange them

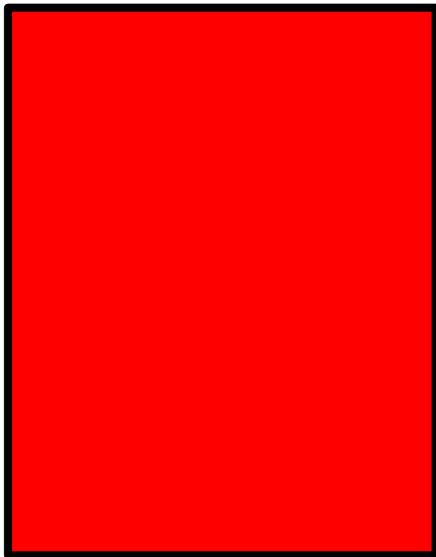

Scoring:

If you're able to create the correct equation, round your score to the nearest $\frac{1}{2}$.

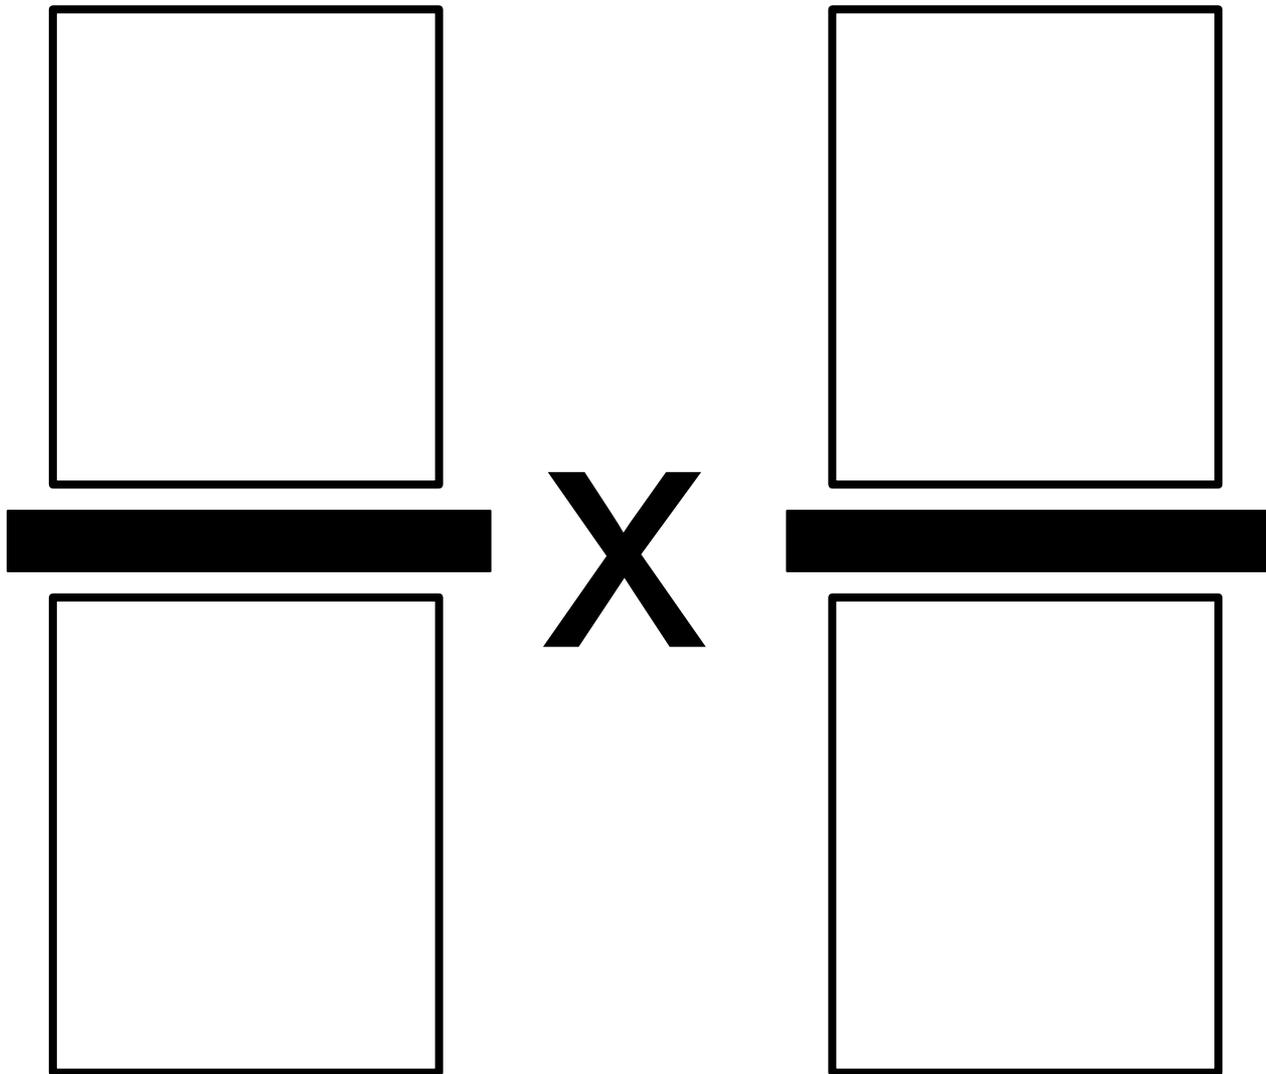

Play 5 rounds, total all your products and the highest score wins.

Place your cards to create an equation that matches the condition you spun.

reject
